

## Civil Designer

### Who We Are

We're a well-established, growing civil engineering, landscape architecture & land planning firm, with offices in uptown Charlotte & downtown Winston-Salem. For more than 30 years, we've worked hard to ensure that our projects are planned, designed & managed to meet not only our high expectations, but to exceed our clients' goals as well. We have a work hard, play hard mentality & we invest into all of our employees.

We are looking to add a Civil Designer to our Civil Engineering team in our Charlotte office. Our Civil Designer's primary role is to provide engineering designs for private land development projects under the direction & supervision of the project engineer.

### What's in It for You

- ***When you work hard, we notice.*** We offer competitive compensation, annual profit sharing, paid time off, a 401(k) plan that includes company match/contribution, a comprehensive benefits package (medical, dental & vision) & disability insurance.
- ***Work with passionate people who are experts in their field.*** Our team loves what they do & has 30 years of profitable experience to prove that we're good at it, too. We offer an opportunity to gain unique experience working directly with Principal Engineers, Department Heads & our Company President on a daily basis.
- ***Be a part of a team that puts people first.*** As our most important asset, people are our primary focus. We strive to maintain our open company culture- in which everyone is a hands-on contributor & feels comfortable sharing ideas & opinions- by offering lunch & learns, monthly company events (cornhole, cook-offs, baseball games, tailgating, etc.) & opportunities to support the communities we work in.

### What You Will Be Doing

You will design & engineer land development projects that include office & commercial sites, single-family & multi-family residential, healthcare, higher education, industrial & business parks & major retail development sites. You'll need to produce detailed engineering designs, review construction drawings & assist the engineer in managing the overall process to meet deadlines within budget constraints, procuring necessary permits & delegating appropriate responsibilities.

### What You Need for this Position

- Associates Degree in Civil Engineering or Related Degree
- 0-5 Years of Experience & Knowledge of:
  - Engineering Design of Land Development Projects
  - Utility Design
  - Site Grading
  - Storm Water Management Systems
  - Zoning Research
  - Permitting Research
  - Software Proficiency: AutoCad Land Development and/or Civil 3D, Hydraflow Storm (or other storm drainage system design software), Hydraflow Hydrographs (or other hydrology/pond design software).

We are looking forward to receiving your resume & going over the position in more detail with you.
